

Rod Clearance 7m Telescopic

A low cost, essential tool for quickly determining the height of telephone drop wires.

The Rod Clearance is telescopic for convenient transport and storage.

Specification:

Note: Current specifications require 12 monthly calibration and that each section of the rod be visibly marked when fully extended to ensure compliance with the overall dimensional tolerance of $-0/+60\text{mm}$.

Rods supplied by JMW meet this requirement and are issued with a certificate of calibration.

The Rod Clearance is available to the latest specification having marks at: 3.0, 3.7, 4.0, 4.6, 4.8, 4.9, 5.0, 5.1, 5.2, 5.3, 5.4, 5.5, 5.6, 5.9 and 6.5 metres
